

Maintain Margins in a Changing Industry

Growth in the furniture and fixtures industry continues to outpace the economy, even while the costs of raw materials, energy and transportation are rising. To maximize profit margins, manufacturers are reengineering their core business processes, from sales to planning and production to warehousing, distribution and customer service. Epicor has the software solutions you need to gain control of your enterprise in this ever-evolving global industry.

- Reduce waste with stronger cost control, lean methodologies and management of key cost elements.
- Streamline order processing while improving accuracy with a rules-based Product Configurator that ensures rapid, accurate configuration.
- Promote improved collaboration throughout the supply chain for optimum results.
- Improve bottom line revenues through greater visibility of front office, warehouse and manufacturing plant floor operations.
- Optimize planning and scheduling for strong cost controls.
- Improve customer communication through powerful Customer Relationship Management (CRM) functionality.
