

7 Ways Technology Can Simplify Your Distribution Business

Utilize today's modern technology to simplify your distribution business—enabling you to do more with less while driving revenue and growth.

Here are seven ways you can start using technology to simplify your business:

- 

Actionable, Real-Time Data

Role-Based Dashboards and Smart Views enable you to drill down, collect, and display data in any way you want so you can take immediate action and make more informed decisions.
- 

Go Mobile

Mobile tools untether your employees so they can be more responsive and better serve customers at the counter, in the showroom, or on a job site.
- 

Centralize Dispatch and Delivery

A built-in system can help you simplify delivery schedules and provide drivers with the tools they need to deliver accurate location-specific loads and capture proof of delivery, signatures, and more. Deliver on-time-in-full every time.
- 

Track, Fulfill, and Update

Reduce time-consuming tasks with all pieces of a transaction in one window. Your staff can find all documents related to transactions with less effort, making it easier to research and respond to requests, make changes, troubleshoot, and more.
- 

Role-Based Workflows

Role-based workflows infuse best practices into your processes so your employees can operate more efficiently and your business can do more without adding staff.
- 

Engage Customers

Modern technology makes it easier to serve customers and position your business as their distributor of choice.
- 

Built-In Manufacturing Tools

Integrate manufacturing into your company's operations to heighten visibility, simplify processes, and optimize efficiency. Look to product configurators, kits, and real-time data to optimize schedules and track materials and labor.

Aging technology can inhibit growth for your distribution business. Learn how industry-leading solutions like Epicor® Prophet 21® help to simplify your processes.
